**Subject: Formal Notice of Claim for Damages Resulting from Platform Negligence
Facilitating Cybercrime, Harassment, and Financial Theft – Claim Amount: \$4,500,000**

I. INTRODUCTION

This document serves as a formal notice and demand for damages against Google LLC ("Google"). This claim is substantiated by newly provided, time-stamped evidence (attached as appendices) proving Google's platforms were instrumental as a vehicle for a malicious actor to execute a campaign of digital terror, harassment, and financial theft against the claimant, beginning in May 2025.

Google's failure to prevent its services (Gmail) from being used to send explicit threats, coupled with its systems' failure to deliver urgent pleas for help during the crisis, constitutes gross negligence and a breach of its duty of care. This claim seeks **\$4,500,000** in damages for direct financial losses, business interruption, and severe emotional distress.

II. FACTUAL BACKGROUND & SUPPORTING EVIDENCE

1. **Google's Platform as a Weapon for Harassment:** On May 20, 2025, a direct threat was received from the email address americashottestproducer@gmail.com. The message stated, "your in deeper and deeper trouble I just wanna go home ok see you told you devil you might wanna try something" (**See Exhibit H / IMG_0291.PNG**). This is irrefutable proof that Google's platform was used to facilitate a campaign of fear.
2. **Google's System Failure in a Moment of Crisis:** On May 21, 2025, an email with the subject line "Help help murder on the loose" was sent to report the ongoing attack. Google's own Mail Delivery Subsystem responded with a "Delivery incomplete" notification, stating it would "retry for 47 more hours" (**See Exhibit G / IMG_0290.PNG**). This is direct evidence that Google's systems received the critical alert but failed to deliver it, leaving the claimant isolated and vulnerable.
3. **Evidence of Financial Theft and Distress:** The attack, facilitated through platforms like Google, resulted in significant financial theft. The actor bragged about stealing "\$300k from cashapp and pay pal" (**See Exhibit F / IMG_0293.PNG**). Frantic messages, such as "Pay pal help I been hacked he stole 100k from me help murder killer," were documented (**See Exhibit I / IMG_0289.PNG**), illustrating the severe emotional and financial distress.
4. **Evidence of Compromised Google Account:** On May 19, 2025, a security alert was received from Google for a "new sign-in on Apple iPhone" to the bookingfordjspeedy@gmail.com account. Contemporaneous notes show powerlessness and entrapment (**See Exhibits / IMG_0296.PNG, IMG_0297.PNG**).

III. LEGAL BASIS FOR CLAIMS

1. **Negligence:** Google breached its duty of care by (a) failing to prevent Gmail from being used for explicit threats, and (b) failing to ensure reliable delivery of critical communications.
2. **Breach of Contract:** Google breached the implied covenant of good faith in its Terms of Service.
3. **Intentional Infliction of Emotional Distress (IIED):** Allowing the platform for terror and blocking pleas constitutes extreme conduct.

IV. DAMAGES

As a direct result of Google's failures, damages are estimated at **\$4,500,000**, covering direct financial losses (\$700,000), business interruption (\$2,000,000), severe emotional distress and mental health costs (\$1,600,000), and legal fees (\$200,000).

V. DEMAND FOR RELIEF

Demand payment of **\$4,500,000** within 30 days. Failure to respond will result in litigation.

Sincerely,

/s/ David Meachum, Esq.

On behalf of Harvey L. Miller Jr.
