Click Run to execute your query.

This screenshot shows the Supabase SQL Editor interface. The left sidebar contains sections for managing queries: SHARED (No shared queries), FAVORITES (No favorite queries), PRIVATE (No private queries created yet, with a note that queries will be automatically saved once writing begins), and COMMUNITY (Templates and Quickstarts). The main workspace is titled '+ New' and includes a search bar, a snippet creation button, and a message to hit 'CTRL+K' to generate a query. It features tabs for 'Results' and 'Chart', and a 'Run' button with a keyboard shortcut. A message at the bottom encourages users to click 'Run' to execute their query. The top navigation bar shows the project name 'GOAT ROYALTY APP' and its status as 'Free', along with tabs for 'main' and 'Production', and a 'Connect' button. The top right corner has a 'Feedback' button and several small icons.
