### Table Editor

schema public

+ New table

Search tables...

No tables or views

Any tables or views you create will be listed here.

- postgres\_table\_0
- postgres\_table\_1
- postgres\_table\_2
- postgres\_table\_3

Create a table

Design and create a new database table

Recent items

No recent items yet

Items will appear here as you browse through your project

The screenshot shows the Supabase Table Editor interface. On the left, there's a sidebar titled 'Table Editor' with a 'schema public' dropdown and a '+ New table' button. Below that is a search bar labeled 'Search tables...'. A message 'No tables or views' is displayed, followed by a note: 'Any tables or views you create will be listed here.' Underneath, a list shows four entries: 'postgres\_table\_0', 'postgres\_table\_1', 'postgres\_table\_2' (which has a cursor icon over it), and 'postgres\_table\_3'. To the right, there's a large central area with a 'Create a table' button and a 'Recent items' section. The 'Recent items' section is currently empty, with a placeholder message: 'No recent items yet. Items will appear here as you browse through your project.'
